Experience (a selection)

FRVR / Senior Software Engineer Publishing (remote)
2025 – 2025

Worked with integrating third party games with FRVR's JS based SDK. Both H5 and Unity games. Misc. maintenance of internal libraries and tools.

BetaDwarf / Unity Game Developer (remote)
2023 – 2024 [Contract work]

Helped finish the reimplementation of their Steam hit game *Minion Masters*. Worked on many aspects of the game: from GUI, game logic, server side, databases, to low level debugging and optimization.

Spelunca / JS Game Developer (remote)
2022 – 2023 [Company closed]

Maintained and developed GoldDigger, a F2P JavaScript game with 3.5M MAU.

TurnHero / Unity Game Developer (remote)
2020 – 2021 [Project closed]

Created the Unity client for a new generic board games platform.

Triband / Unity Game Developer (remote)
2019 – 2019 [Contract work]

Worked on the Unity indie hit game “WHAT THE GOLF!” (IGN mobile GOTY).

Unity Technologies / Editor Developer
2016 – 2017

Worked on maintaining and developing the Unity Editor.

Technologies involved: C#, C++, humongous code base

Red Zebra Games / Unity Game Developer
2011 – 2012 [Company closed]

Programmed the game "Raid Leader".

Great reviews & AppStore rating of 4.5 / 5.

NDS Denmark / Software Architect
2002 – 2011 [Company closed]

- Made a native PC Development Runtime of OpenTV to speed up development

- Made about 15 casual games for OpenTV
- Spearheaded game prototypes for client communications (instead of written contracts)
- Helped port Unity to an interactive television platform
- Taught new Game Developers
- Ported dev platform from Unix to Windows/Cygwin
- Led a small infrastructure team

Education

University of Copenhagen / M.Sc., Computer Science (Biology Minor)

1994 – 2000

Master's thesis in Evolutionary Robotics (applied AI)
